QUBO POWER MAG SMART B+

QUBO POWER MAG SMART B+

FEATURES

SMARTER TRAINING

The Resistance unit wirelessly sends speed/power/cadence data via both ANT+™ and Bluetooth Smart transmission protocols making it easier to connect to smartphones, tablets, cycle computers and apps with one or both protocols.

COMPATIBLE CON CYCLOCOMPUTER

All the current-gen cycle-computers with wireless ANT+™ and Bluetooth Smart protocols can be paired with the hometrainer and their training session data viewed.

POWER MAG TECHNOLOGY

Magnetic resistance unit with 8 levels of resistance controlled from the handlebar mount sequential shifter.

Offers a very wide range of power, ensuring any type of training from agility high cadence (level 1) to power training even at low speeds (level 8).

ELASTOGEL ROLLER

30mm diameter Elastogel Roller, which reduces noise by 50%, tyre consumption by 20% and increases tyre grip.

QUBO FRAME

The cutting-edge design combines the strength

of steel with the hi-tech benefits of modern plastics.

Includes the exclusive Crono Compass System which realistically simulates road riding (weight/power).

SAFE AND STABLE

Stability has been considerably improved compared to previous versions, thanks to a wider resting surface and to the optimization of the bicycle+rider center-of-mass in relation to the frame.

This offers safe training conditions even at high speeds or under maximum effort.

FULL COMPATIBILITY WITH BICYCLES

The new frame model has been designed to ensure full compatibility with the most modern bicycles available on the market, and it can be adapted to all types of wheels with diameters between 20" and 29".

FAST FIXING SYSTEM

A fast fixing mechanism for frame clamping onto the bicycle.

By acting on a handy lever, it is possible to clamp or release the bicycle just with one operation.

During the first use of the frame the fixing pin must be adjusted in order to ensure correct functioning of the fast fixing mechanism.

All operations are carried out on one side only,

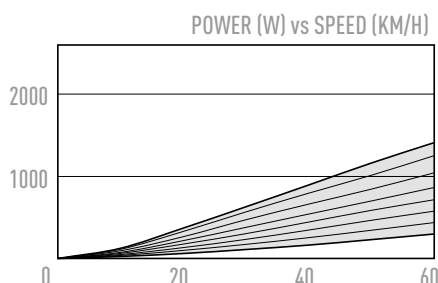

making them easy and fast.

MY E-TRAINING

an exciting and technically sophisticated virtual coach that travels with you whatever your destination. Manage power, heart rate, speed, time and distance directly from your smartphone or tablet with the My E-Training.

QUBO POWER MAG SMART B+

elite-it.com

FEATURES

HOME TRAINER TYPE	Smart magnetic home trainer (non-interactive) with sequential selector and automatic reading of the resistance level.
WIRELESS COMMUNICATION	ANT+™ (Power and Speed&Cadence) and Bluetooth (Power and Speed&Cadence)
MAX POWER	370 Watt (20km/h) - 900 Watt (40km/h)
CONTROL VIA	8-level sequential resistance selector
COMPATIBLE WITH	My E-Training software & app Zwift, Trainer Road, Bikevo, Kinomap, The Sufferfest and more
OUTPUT	Power, speed and cadence (heart rate if connected to a heart rate monitor, not included)
FLYWHEEL	2,3 kg
BIKE COMPATIBILITY	Race bike, Mountain bike and city bike, also carbon ones, with 130x135 x 5mm hubs and with quick clamping system and 142x12 mm with thru-axle (ad adapter is available for Boost 148x12 mm rear hubs)
INCLUDES	12-month free subscription to My E-Training software & app

SPECIFICATIONS

ELECTRICAL REQUIREMENTS	No power supply
SPACE OCCUPIED WHEN UNFOLDED (LXP)	590 x 560 mm
HEIGHT	415 mm
WEIGHT	8,7kg
